Subject: Cabo Rojo Site - Scheduled visits to your facilities

Good morning all,

Our field staff will be visiting your facility (Propper inactive and Pedernales Industrial Park) tomorrow to measure water levels from the installed monitoring wells. This measurements will take less than an hour.

The next visit is scheduled for Friday February 7th, 2014. The field staff will arrive at both facilities between 7 to 8am to sample the monitoring wells, sampling will be simultaneous. The sampling may take up to 3 hours in total. This visit will complete our programed field activities for this phase of the investigation. Will appreciate your collaboration as always. Please plan accordingly.

Thanks,

Frances Delano, P.G.
